

Roster of Data Stewards

Data Stewards oversee the capture, maintenance, storage, use, and dissemination of University Data and information for a particular function or operation; they may be considered System Owners for stores and systems they purchase, operate, or contract with a third party/service provider to operate and/or host.

This official roster of designated Data Stewards, as confirmed by Data Trustees, is maintained by the Data Steward Program Manager.

Data Trustees, generally persons designated under policy UNIV 1.00 as University Policy Responsible Officers **are responsible under policy UNIV 1.51 for designating Data Stewards for each operational and function area and/or data domain within their area of responsibility.**

- This designation should be incorporated in each designee's official position description and should generally be attached to the designee's role/position for continuity and clarity with successors in the same position.
- Data Trustees must inform the Data Steward Program Manager of their designated Data Stewards.

Document Custodian

Data Steward Program Manager
Sue Porter
Division of Information Technology
porters@mailbox.sc.edu

The Data Steward Program Manager maintains this roster and must be notified of changes.

In the event a user cannot identify an appropriate Data Steward, please contact the Data Steward Program Manager.

Definitions

Data Trustees

UNIV 1.51 (Data and Information Governance, <http://www.sc.edu/policies/ppm/univ151.pdf>)

¶ I.A.4 reads: “Data Trustees shall be responsible for data-related strategic planning and policy approval for all organizational units under their charge that manage or receive University Data; for designating and managing Data Stewards of these units; and for assuring that Data Stewards and their organizational units actively support the policy, programs, and guidelines of data and information governance. Data Trustees shall enumerate data stewardship as an essential job duty for appropriate direct reports.”

¶ I.B.9 defines the following: “Data Trustees have strategic planning and policy-making responsibilities with implications for University Data. Data Trustees designate Data Stewards for the organizational units under their care. Individuals identified in the University Policy Responsible Officer List (see UNIV 1.00, Policy on Policies, Appendix 1) shall be Data Trustees.”

Data Stewards

UNIV 1.51 ¶ I.A.5 reads: “Data Stewards shall establish and enforce practices and procedures that are binding on organizational units and users that provide, receive, store, or manage University Data and information under the Data Steward’s care. Subject to federal and state law and regulation as well as directives of the Board of Trustees and university policy, Data Stewards are responsible for the following with respect to data, information, and related assets under their care:

- a) determine and document classification of data elements and assets;
- b) understand and apply security and privacy standards, guidelines, and practices (see IT 3.00, Information Security);
- c) review requests and determine, approve, and assign access and permissions to University Data, information, and systems for End Users (internal and external), organizational units, system integrations, as well as sharing agreements;
- d) review and determine acceptability, conditions, and controls applicable to requests for University Data, information, and related systems to be processed, stored, or hosted by a third-party, prior to processing or storage;
- e) prior to issuing access and permissions (internal and external), verify that users or third parties have acknowledged and accepted responsibility for appropriate use and confidentiality of data, technology, and user credentials (see UNIV 1.52, Responsible Use of Data, Technology, and User Credentials);
- f) with appropriate controls and restrictions, ensure broad access to University Data that enables institutional and organizational unit operations, reporting, business intelligence, and decision support;
- g) actively represent the concerns and interests of his/her organizational unit through participation in the Data Stewardship Council; and
- h) carry out activities and directives approved by the Data Trustee to whom he or she reports.”

UNIV 1.51 ¶ I.B.8 defines the following: “Data Stewards oversee the capture, maintenance, storage, use, and dissemination of University Data and information for a particular function or operation; they may be considered System Owners for stores and systems they purchase, operate, or contract with a third party/service provider to operate and/or host. The official roster of designated Data Stewards, as confirmed by Data Trustees, is maintained by the Chief Data Officer.”

GENERAL GUIDELINES: DATA ACCESS REQUESTS

Data access must conform two university policies:

- UNIV 1.51 – Data and Information Governance. This policy specifies general requirements and actions for Data Trustees and Data Stewards.
- UNIV 1.52 – Responsible Use of Data, Technology, and User Credentials. This policy is binding on user access to data, as well as system integrations and data feeds from one information system to another.

The University of South Carolina adheres to the Principle of Least Privilege. As such, persons should not request nor be permitted to access data without a demonstrated need. For employees, this most often requires the authorization of one's supervisor/manager, as well as the permission of the officially designated Data Steward(s) of the data requested. For persons external to the university, this requires Data Steward approval and often entails a formal Freedom of Information request through the Office of General Counsel.

Data access requests are not automatically approved and may take considerable time to review and/or complete. Requests often requires thoughtful consideration of the business need, iterative clarification between the requestor and the Data Steward, as well as consideration of legal, regulatory, and/or policy and procedural constraints.

As noted above under provisions of UNIV 1.51, above, Data Stewards hold the authority and responsibility to make access decisions and may place constraints on the use of data to which access is granted. Decisions of Data Stewards are generally final but may be subject to review or modification by the appropriate Data Trustee.

The appropriate Data Sharing Agreement must be completed before data is shared. DSAs articulate the specific business case/purpose for the sharing, the list of data elements requested/authorized, and other critical parameters of the request or constraints and limitations.

- [User Agreement](#) – for authorization of an individual UofSC employee or other constituent
- [Internal Data Sharing Agreement](#) – between units within UofSC, including system integrations
- [External Data Sharing Agreement](#) – between a UofSC unit and an external party, not related to a formal contract (e.g. may be required with FOIA requests or sharing with state agencies)
- [Contract Addendum for External Data and Systems Service Providers](#) – between a UofSC unit and a vendor/3rd party that serves as a formal contract appendix

Enrollment Management & Student Data. For access to enrollment management-related data and information systems, as well as data feeds/integrations, including Admissions, Financial Aid & Scholarships, and Registrar, users should submit a request through the Data Access Permissions System (DAPS), <https://www.sc.edu/daps/>. Additionally, authorized access to student data may require the approval and prioritization of the Student Systems Council, when the sharing requires work by enterprise applications personnel.

All other Data Domains. Please contact the Data Steward responsible for the data you seek, based on the information below. Information is organized by University Policy Responsible Officer, per University Administration policy UNIV 1.00 – Policy on Policies: Development and Oversight of University Policies.

UOFSC SYSTEM-WIDE DATA DOMAINS

Operational Area	Data Trustee	Data Steward
System-wide – Institutional Reporting	Stephen Cutler	Cheryl Addy
System-wide – Financial Aid	Scott Verzyl	Joey Derrick
System-wide – Registrar	Scott Verzyl	Aaron Marterer
System-wide – Human Resources	Caroline Agardy	Stacy Lee, Belinda Ogorek, John Waters
System-wide – Financials (University Controller, including General Accounting, Financial Reporting, Capital Finance)	Ed Walton	Mandy Kibler
