CENTER

Science Meeting

October is Down Syndrome
Awareness Month!

Learn about Down
Syndrome with Dr.
Liz Will and
Manasi Agrawal

Dr. Will will present preliminary data from her NIH F32 study on co-occurring autism in Down syndrome and discuss considerations related to early delays and developmental profiles with implications for assessment.

Manasi will present her dissertation work showing morphological changes observed in Down syndrome human iPSC-derived neurons during development and discuss potential pathways that may be contributing to this phenotype.

October 6, 3:30PM

**IMB Conference Room
1800 Gervais St.**

Join us after for Happy Hour ~4:30PM at the Graduate Hotel
